Flow 6: Complete User Journey

eraser

The flows cover:

1. **Consent Generation** - User gives consent → system creates signed receipt
2. **Real-time Verification** - App checks if consent is valid before using data
3. **Revocation Control** - User cancels consent → all future verifications fail
4. **Usage Beacons** - App logs when/how data is used for audit trail
5. **Dashboard View** - User interface to manage all consents
6. **Complete User Journey** - End-to-end flow showing the full lifecycle
